EDUCATION & SKILLS

University of California, Irvine - B.S. Informatics (Organizations and IT)
Minor in Management (Innovation and Entrepreneurship)

June 2022

PROJECTS

MyPaymentsLog (Payment Tracking Web Application)

Dec 2025 – Present

Next.js · TypeScript · Tailwind · Prisma · PostgreSQL · Plaid · Auth.js · Vercel

- Built a full-stack web application to track and manage personal financial transactions, from concept to deployment
- Integrated Plaid API for secure account linking and real-time transaction retrieval
- Developed responsive UI using Next.js and Tailwind, optimizing usability and performance
- Designed backend architecture with Prisma and PostgreSQL, structuring scalable relational data models
- Implemented authentication and session management using Auth.js (OAuth + credentials)
- Created workflows for both digital and manual transaction tracking, including QR-based logging
- Deployed application on Vercel, managing environment configuration and production builds
- Leveraged AI-assisted development tools (Cursor, v0.dev) to accelerate prototyping, debugging, and feature iteration

KeepMeClose (Relationship Management & Reminder Application)

Feb 2026 – Present

Next.js · TypeScript · Tailwind · React Query

- Built an application to help users maintain relationships through scheduled reminders and interaction tracking
- Designed a custom scoring and ranking system to balance daily, weekly, and monthly engagement consistency
- Developed core features including contact management, reminder scheduling, and engagement dashboards
- Engineered UX flows to capture and confirm real-world interactions, improving tracking accuracy
- Implemented backend logic to handle state transitions and edge cases, such as frequency changes
- Iterated on product features based on early user feedback and usage patterns
- Utilized AI-assisted tools (Cursor, v0.dev) to rapidly prototype and refine application features

WORK EXPERIENCE

Python Developer | Job Application AI Startup (Remote)

Jan 2025 - Sept 2025

- Built a Python-based automation agent to streamline job application submissions across multiple platforms
- Implemented web scraping, form automation, and error handling, improving submission efficiency and reliability
- Collaborated with a senior developer to translate user needs into functional product features

Certified Personal Trainer | In-Shape (Napa, CA)

May 2025 - Oct 2025

- Designed personalized training programs and tracked measurable progress through structured check-ins
- Built strong client relationships while consistently driving engagement and retention

Member Experience Ambassador | In-Shape (Napa, CA)

Jan 2023 - Oct 2025

- Led customer onboarding and tours, improving conversion through clear communication and rapport building
- Contributed to membership growth by addressing customer needs and enhancing overall experience

Marketing Specialist Intern | Vedara: Wellright Schools (Remote)

Sept 2024 - Dec 2024

- Managed social media content and campaigns, increasing engagement through targeted posts
- Analyzed performance metrics to refine marketing strategy and improve reach
- Designed branded visuals using Canva to support campaign goals

SKILLS

Languages: Python, Java, HTML/CSS, R

Frameworks/Tools: Next.js, React, Tailwind, Prisma, PostgreSQL

Technologies: Git, Figma, Jira, Google Workspace, Microsoft Office

Other: API Integration, Authentication Systems, Full-Stack Development, AI-Assisted Development

CERTIFICATIONS

Google Project Management Certificate

Google IT Support Professional Certificate

NASM Certified Personal Trainer (2025)
