SUMMARY

Full-stack software engineer with a focus on AI-powered product development, data pipelines, and SaaS architecture. Experienced building and shipping production applications end-to-end, from scrape pipelines and LLM integrations to Stripe-gated subscription systems and real-time analytics. Skilled in AI-assisted development workflows using Claude, Claude Code, Cursor, and OpenAI APIs. Passionate about applying intelligent automation and modern web frameworks to build scalable, user-facing products.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Java, R

Frameworks & Libraries: Next.js (App Router), React, Tailwind CSS, shadcn/ui, Prisma ORM

Backend & Databases: PostgreSQL, REST APIs, relational data modeling, backend service development, API integration

AI & LLM Tools: Claude AI, Claude Code, Cursor, ChatGPT / OpenAI API, prompt engineering, LLM workflow design, AI-assisted development

Data & Automation: Scrape pipelines (Apify), ETL workflows, data validation, algorithmic comp scoring, background workers

SaaS & Payments: Stripe subscriptions, tiered feature gating, Auth.js (OAuth + credentials), session management

Infrastructure & DevOps: Vercel, Cloudflare, Git, GitHub, Jira, Agile

SEO & Growth: SSR, JSON-LD structured data, sitemaps, RSS feeds

WORK EXPERIENCE

Python Developer | AI Job Application Automation Startup — Remote

Jan 2025 – Sept 2025

- Built Python-based data pipelines that ingested, normalized, and processed large volumes of structured and semi-structured job listing data across multiple platforms.
- Implemented algorithmic filtering and matching systems to score and rank job opportunities against user-defined criteria using predictive logic.
- Designed robust backend workflows with error handling, retry logic, and monitoring, improving submission reliability and system uptime.
- Created scalable data-processing architecture capable of handling and validating high-volume datasets with minimal manual intervention.
- Collaborated with a senior engineer to translate user requirements into modular, maintainable backend services.

Certified Personal Trainer | In-Shape — Napa, CA

May 2025 – Oct 2025

- Designed personalized training programs and tracked measurable client progress through structured check-ins.
- Built strong client relationships, consistently driving engagement and retention.

Member Experience Ambassador | In-Shape — Napa, CA

Jan 2023 – Oct 2025

- Led customer onboarding and facility tours, improving membership conversion through clear communication and rapport building.
- Contributed to membership growth by addressing customer needs and enhancing the overall member experience.

Marketing Specialist Intern | Vedara: Wellright Schools — Remote

Sept 2024 – Dec 2024

- Managed social media content and campaigns, increasing engagement through targeted posts and audience-driven strategy.
- Analyzed performance metrics to refine marketing approach and improve campaign reach.
- Designed branded visuals using Canva to support campaign goals.

PROJECTS

CardPeek — Live SaaS · Pokémon Card Price Intelligence Platform (cardpeek.app)

[Next.js 14](#) · [TypeScript](#) · [React 18](#) · [Tailwind](#) · [shadcn/ui](#) · [Prisma](#) · [PostgreSQL](#) · [Stripe](#) · [Apify](#) · [Vercel](#) · [Cloudflare](#) · [Resend](#)

- Sole engineer — architected and shipped a full SaaS product end-to-end in 6 weeks, now serving paying subscribers.
- Built a complete scrape-to-pricing pipeline: queue management → Apify actor execution → comp scoring → cache → UI delivery.

- Designed a custom comp scoring algorithm with recency weighting, outlier detection, bundle/lot filtering, and condition-aware fallback scraping to surface accurate market prices.
- Implemented cost-control infrastructure including daily scrape budget caps, rate limiting, and deduplication guards to manage third-party API spend.
- Integrated Stripe subscription billing with tiered feature gating enforced at the API level, supporting multiple subscription plans.
- Built SEO infrastructure including SSR card detail pages, JSON-LD structured data, dynamic sitemaps, and RSS feeds.
- Developed a background worker service for async scrape job processing, price history tracking, watchlist management, and portfolio valuation.

KeepMeClose — AI-Powered Relationship Management & Reminder Application

[Next.js](#) · [TypeScript](#) · [Tailwind](#) · [React Query](#) · [Supabase](#) · [OpenAI API](#)

- Built a full-stack application to help users maintain relationships through intelligent reminders and interaction tracking.
- Designed and integrated an AI-powered assistant that generates personalized follow-up suggestions using contact history, notes, and engagement patterns.
- Engineered prompt pipelines and structured data flows to incorporate contextual inputs into OpenAI-generated recommendations.
- Developed a custom scoring and ranking system to balance daily, weekly, and monthly engagement consistency across contacts.
- Implemented backend state management for edge cases including streak recalibration when reminder frequency changes.
- Iterated on AI behavior and product features based on early user feedback, improving relevance and usability of suggestions.

MyPaymentsLog — Personal Financial Transaction Tracking Platform

[Next.js](#) · [TypeScript](#) · [Tailwind](#) · [Prisma](#) · [PostgreSQL](#) · [Plaid API](#) · [Auth.js](#) · [Vercel](#)

- Built and deployed a full-stack financial tracking application from concept to production.
- Integrated Plaid API for secure bank account linking and real-time transaction retrieval.
- Designed a PostgreSQL relational schema optimized for analytical queries across large transaction datasets.
- Implemented authentication and session management using Auth.js with OAuth and credentials-based flows.
- Created workflows for both digital and manual transaction logging, including QR-code-based entry.

EDUCATION

University of California, Irvine — B.S. Informatics

June 2022

Specialization: Organizations & Information Technology | Minor: Management (Innovation & Entrepreneurship)

Relevant Coursework: Software Design, Database Systems, Data Analysis, Requirements Engineering, Human-Computer Interaction

CERTIFICATIONS

- Google Project Management Certificate
- Google IT Support Professional Certificate
- NASM Certified Personal Trainer (2025)
